EDUCATION

2023 – 2027 **Vellore Institute of Technology, Vellore** **9.02 CGPA**
B.Tech in Computer Science and Engineering

ABOUT ME

Final-year CS undergraduate who landed at the intersection of machine learning and application security almost by chance, and stayed because the problems are genuinely interesting. Recent work spans risk-scoring ML pipelines for vulnerability triage and agentic RAG systems for forecasting and compliance automation, alongside running large-scale technical events as Head of Events for IEEE-SSIT.

EXPERIENCE

AI/ML Intern, Caze Labs (Certificate) May 2026 – July 2026

- Designed and built a context-aware vulnerability risk-scoring engine for SAST, DAST, and SCA findings, replacing a static rule-based formula that ignored deployment environment and security posture.
- Trained and benchmarked LightGBM, and XGBoost on a synthetically generated dataset, for impact classification of DAST findings. Built to company standards.

Head of Events, IEEE-SSIT Student Chapter (Certificate) VIT Vellore

- Planned, managed, and hosted a tech talk with Shashi Prabha Singh, VP Data & AI at Capgemini, and Striver, for an audience of 600+ students.
- Planned, managed, and ran Code4Change, an IEEE-SSIT hackathon held during Yantra, VIT Vellore's flagship annual tech week, a 72-hour hack for 800+ participants. Collaborating with big sponsors.

PROJECTS

Corporate Financial Risk Detector [GitHub](#)

- Engineered a LangGraph agent to monitor databases and forecast 90-day burn rates using Meta Prophet.
- Built a structure-aware RAG pipeline using Docling to parse complex tables and automate policy compliance.
- **Tech:** LangGraph, Meta Prophet, Docling, Streamlit, MySQL, Python.

Data Forge [GitHub](#)

- AI-powered EDA tool for automated data synthesis, health audits, and code generation.
- Engineered FastAPI and Llama 3.3 for trend detection; built React/Plotly UI to export optimized Pandas workflows.
- **Tech:** FastAPI, React, Plotly.js, Pandas, Llama 3.3, Python.

Travel Planning Assistant [GitHub](#)

- AI-powered eco-travel planner generating itineraries from user constraints.
- RAG pipeline using ChromaDB embeddings, FastAPI generative service using fine-tuned Falcon-1B.
- **Tech:** FastAPI, Streamlit, LangChain, ChromaDB, PyTorch.

TECHNICAL SKILLS

Languages	Python, Java, C/C++, SQL, HTML/CSS
ML & Data	PyTorch, LightGBM, XGBoost, SHAP, scikit-learn, Pandas
LLM / Agentic	LangChain, LangGraph, RAG, ChromaDB, Meta Prophet, Docling
Backend & Web	FastAPI, Streamlit, MySQL
AppSec Tooling	OWASP ZAP, SonarQube, Trivy, SAST/DAST/SCA

CERTIFICATIONS

- [Supervised Machine Learning: Regression and Classification](#) – *DeepLearning.AI*
- [Advanced Learning Algorithms](#) – *DeepLearning.AI*
- [Unsupervised Learning, Recommenders, Reinforcement Learning](#) – *DeepLearning.AI*
- [DevOps Fundamentals](#) – *IBM*

ACHIEVEMENTS

- Cracked Top 40 teams in ZS Campus Beats, in India-wide hack.
- 5th Overall in HackX 3.0 hackathon in Gravitas'25.
- Reached Top 20 teams in DevSpace university-wide hackathon.
